

Middle Stone Age NSF Research Experience for Undergraduates

Come to Ethiopia and study the Middle Stone Age of Africa!

This NSF-sponsored Research Experience for Undergraduates is designed to engage students in the study of early modern humans during the time period when our species evolved sophisticated foraging behaviors. The REU includes a month of field work and a month of museum or laboratory research in archaeology, paleontology, geochronology, geochemistry, and geology. The project covers all expenses and pays a stipend. This is an exceptional opportunity!
